4. FIRST AID MEASURES

INHALATION: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention if breathing problems develop.

SKIN CONTACT: In case of skin contact, immediately remove contaminated clothing and wash affected areas with water and soap. Seek medical attention if symptoms occur.

EYE CONTACT: In case of eye contact, hold eyelids open and rinse with water for at least 15 minutes. Do not rub or scratch eyes. Seek medical attention if symptoms occur.

INGESTION: If swallowed, do not induce vomiting. Never give anything by mouth to an unconscious person. Seek immediate medical attention.

SYMPTOMS CAUSED BY EXPOSURE:

Inhalation: Dusts may cause respiratory irritation, coughing and sneezing.

Skin Contact: Dusts may cause skin irritation.

Eye Contact: Dusts may cause eye irritation.

Ingestion: Dusts may cause gastrointestinal irritation.

5. FIRE FIGHTING MEASURES

SUITABLE EXTINGUISHING MEDIA: Use fire extinguishing methods suitable to surrounding conditions, such as water and/or dry chemical fire extinguisher.

SPECIFIC HAZARDS ARISING FROM THE CHEMICAL: Hazardous combustion products include oxides of carbon, carbon particles and other decomposition products derived from the pyrolysis of organic materials. This product is not flammable but may burn or decompose in a fire. Product close to fire should be removed if safe to do so.

SPECIAL PROTECTIVE EQUIPMENT AND PRECAUTIONS FOR FIRE FIGHTERS: Firefighters when fighting a major fire to wear self-contained breathing apparatus and protective equipment.

6. ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES: Wear approved class P1 (particulate) respirator, protective gloves and eye or face protectors for protection against dust. Evacuate all non-essential personnel from affected area. Do not breathe dust. Ensure adequate ventilation. Avoid generating dust.

ENVIRONMENTAL PRECAUTIONS: In the event of a major spill, prevent spillage from entering drains or water courses.

METHODS AND MATERIALS FOR CONTAINMENT AND CLEANING UP: Pick up large pieces and clean the area using a HEPA vacuum cleaner. Wet mopping and wiping are acceptable if vacuuming is not workable. Do not use compressed air.

7. HANDLING AND STORAGE

PRECAUTIONS FOR SAFE HANDLING: Use of safe work practices are recommended when cutting the product to avoid eye or skin contact and inhalation of dust. To minimise dust generation when cutting the product hand tools are recommended in preference to power tools. If power tools are used, these should be fitted with dust extraction or other effective local ventilation. Always wash hands after use.

CONDITIONS FOR SAFE STORAGE: Store in a cool, dry and well-ventilated area. Protect from excessive moisture and high humidity.

RESPIRATORY PROTECTION: Where an inhalation risk exists, wear a Class P1 (particulate) respirator. See Australian/New Zealand Standards AS/NZS 1715 and 1716 for more information.

SKIN PROTECTION: Skin protection is not required under normal use conditions. Protective gloves are recommended for prolonged contact. See Australian/New Zealand Standard AS/NZS 2161 for more information. When selecting gloves for use against certain chemicals, the degradation resistance, permeation rate and permeation breakthrough time should be considered.

Occupational protective clothing (depending on conditions in which it must be used, as regards the period for which it is worn, which shall be determined based on the seriousness of the risk, the frequency of exposure to the risk, the characteristics of the workstation of each worker and the performance of the protective clothing). See Australian/New Zealand Standard AS/NZS 4501 for more information.
